

Multimedia Resources

The following web sites are intended to assist in finding the clipart, sounds, animations and/or video a teacher needs for their classroom projects. It is strongly suggested that the teacher preview any of these sites prior to permitting the students to browse the site.

Be aware that many schools and districts block access to sites which contain image libraries. Some of the following sites may be blocked, but hopefully not all. If you find an educational clipart site blocked, ask your network administrator to evaluate the site and permit access for the teachers and students.

A great teacher starting point. This site is a collection of sites which include everything from clip art, fonts, tutorials, etc.

<http://scc.pinehurst.net/graphics.html>

Great for kid's clip art.

<http://www.thekidzpage.com/freekidsclipart/index.htm>
